INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF KUWAIT FINANCE HOUSE K.S.C.

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of Kuwait Finance House K.S.C. (the bank) and Subsidiaries (the group), which comprise consolidated balance sheet as of 31 December 2007, the related consolidated statements of income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Directors' Responsibility for the Consolidated Financial Statements

The bank's directors are responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards adopted for use by the State of Kuwait. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate for the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the bank's management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the group as of 31 December 2007, and the results of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted for use by the State of Kuwait.

Report on Other Legal and Regulatory Requirements

Furthermore, in our opinion proper books of account have been kept by the bank and the consolidated financial statements, together with the contents of the report of the bank's board of directors relating to these consolidated financial statements, are in accordance therewith. We further report that we obtained all the information and explanations that we required for the purpose of our audit and that the consolidated financial statements incorporate all information that is required by the Commercial Companies Law of 1960, as amended, and by the bank's articles of association, that an inventory was duly carried out and that, to the best of our knowledge and belief, no violations of the Commercial Companies Law of 1960, as amended, nor of the articles of association have occurred during the year ended 31 December 2007 that might have had a material effect on the business of the group or on its financial position.

We further report that, during the course of our audit, we have not become aware of any material violations of the provisions of Law No. 32 of 1968, as amended, concerning currency, the Central Bank of Kuwait and the organisation of banking business, and its related regulations during the year ended 31 December 2007.

Kuwait Finance House K.S.C. and Subsidiaries

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2007

1 ACTIVITIES

The consolidated financial statements of the group for the year ended 31 December 2007 were authorised for issue in accordance with a resolution of the banks' board of directors on 7 January 2008 and were approved by the Central Bank of Kuwait. The general assembly of the equity holders of the bank has the power to amend these consolidated financial statements after issuance.

The group comprises Kuwait Finance House K.S.C. (the bank) and its consolidated subsidiaries (the group) as noted in Note 20. The bank is a public shareholding company incorporated in Kuwait on 23 March 1977 and was registered as an Islamic bank with the Central Bank of Kuwait on 24 May 2004. It is engaged principally in providing banking services, the purchase and sale of properties, leasing, project construction for its own account as well as for third parties and other trading activities without practising usury. Trading activities are conducted on the basis of purchasing various goods and selling them on murabaha at negotiated profit margins which can be settled in cash or on instalment credit basis. The bank's registered head office is at Abdulla Al-Mubarak Street, Murqab, Kuwait.

All activities are conducted in accordance with Islamic Shareea'a, as approved by the bank's Fatwa and Shareea'a Supervisory Board.

The bank operates through 44 local branches (2006: 42) and employed 1,969 employees as of 31 December 2007 (2006: 1,809) of which 1,110 (2006: 973) are Kuwaiti nationals representing 56% (2006: 54%) of the bank's total work force.

2 SIGNIFICANT ACCOUNTING POLICIES

Basis of preparation

The consolidated financial statements have been prepared in accordance with the regulations of the Government of Kuwait for financial services institutions regulated by the Central Bank of Kuwait. These regulations require adoption of all International Financial Reporting Standards (IFRS) except for the IAS 39 requirement for collective provision, which has been replaced by the Central Bank of Kuwait's requirement for a minimum general provision as described under the accounting policy for impairment of financial assets.

The consolidated financial statements have been presented in Kuwaiti Dinars.

Accounting convention

The consolidated financial statements are prepared under the historical cost convention modified to include the measurement at fair value of available for sale investments.

The accounting policies are consistent with those used in the previous year, except for the disclosures mandated by the new IFRS adopted by the group as described below and the new Kuwait Zakat law regulations as noted under "Zakat" below.

The group has adopted IFRS 7 'Financial Instruments: Disclosures' and amendments to IAS 1 'Presentation of Financial Statements' effective for the year ended 31 December 2007 which has resulted in amended and additional disclosures relating to financial instruments and associated risks, capital and capital management (See Notes 4, 24, 26, 27, 28, 29 and 30). In accordance with transitional requirements of the standards, the group has provided full comparative information.

New standards and interpretations issued but not yet effective

The following standards and interpretations have been issued by the IASB, but are not yet effective:

IFRS 8: Operating Segments (effective 2009)

IFRIC 13: Customer Loyalty Program (effective 2008)

Additional disclosures will be made in the financial statements when these standard and interpretation becomes effective.

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

Basis of consolidation

The consolidated financial statements include the financial statements of the bank for the year ended 31 December 2007 and its subsidiaries prepared to a date not earlier than three months of the bank's reporting date as noted in Note 20. All significant intra-group balances, transactions and unrealised profits are eliminated upon consolidation.

Since the subsidiaries' financial statements used in the consolidation are drawn up to different reporting dates, adjustments were made for the effects of significant transactions or other events that occurred between the reporting date of the subsidiaries and the bank's reporting date.

Certain of the consolidated subsidiaries use accounting policies other than that adopted in the consolidated financial statements for certain transactions and assets. Hence, appropriate adjustments for non-uniform accounting policies are made to their financial statements when included in the consolidated financial statements to bring them in line with group accounting policies.

Subsidiaries are fully consolidated from the date on which control is transferred to the group. Control is achieved where the group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The results of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the date of acquisition or upto the date of disposal, as appropriate.

Minority interests represent the portion of profit or loss and net assets not held by the group and are presented separately in the consolidated income statement and within equity in the consolidated balance sheet, separately from the bank's shareholders' equity. Acquisition of minority interests are accounted for using the parent company extension method, whereby, the difference between the consideration and the book value of the share of the net assets acquired is recognized as goodwill.

Any excess of the cost of acquisition over the fair values of the identifiable net assets acquired is recognised as goodwill. Any deficiency of the cost of acquisition below the fair values of the identifiable net assets acquired (i.e. a discount on acquisition) is recognised directly in the income statement in the year of acquisition.

Short-term international murabaha

Short-term international murabaha are financial assets originated by the group and represent deals with high credit quality international banks and financial institutions maturing within three months of the balance sheet date. These are stated at amortised cost.

Receivables

Receivables are financial assets originated by the group and principally comprise murabaha, wakala, istisna'a and receivables. These are stated at amortised cost.

Murabaha is the sale of commodities and real estate at cost plus an agreed profit mark up whereby the seller informs the purchaser of the price at which he purchases the product and also stipulates an amount of profit.

Istisna'a is a sale contract between a contract owner and a contractor whereby the contractor based on an order from the contract owner undertakes to manufacture or otherwise acquire the subject matter of the contract according to specifications, and sells it to the contract owner for an agreed upon price and method of settlement whether that be in advance, by instalments or deferred to a specific future time.

Wakala is an agreement whereby the group provides a sum of money to an agent, who invests it according to specific conditions in return for a fee. The agent is obliged to return the amount in case of default, negligence or violation of any terms and conditions of the wakala.

Impairment of financial assets

An assessment for a group of financial assets is made at each balance sheet date to determine whether there is an objective evidence that a specific group of financial asset may be impaired. If such evidence exists, an impairment loss is recognised in the consolidated income statement.

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

Impairment of financial assets (continued)

Impairment is determined as follows:

- (a) for assets carried at amortised cost, impairment is based on estimated cash flows discounted at the original effective rate of return;
- (b) for assets carried at fair value, impairment is the difference between cost and fair value; and
- (c) for assets carried at cost, impairment is the difference between cost and present value of future cash flows discounted at the current market rate of return for a similar financial asset.

In addition, in accordance with Central Bank of Kuwait instructions, a minimum general provision on all finance facilities net of certain categories of collateral, to which CBK instructions are applicable and not subject to specific provision, is made.

Reversal of impairment losses recognised in prior years is recorded when there is an indication that the impairment losses recognised for the financial asset no longer exist or have decreased and the decrease can be related objectively to an event occurring after the impairment was recognised. Except for equity instruments classified as available for sale, reversals of impairment losses are recognised in the consolidated income statement to the extent the carrying value of the asset does not exceed its amortised cost at the reversal date. Reversals in respect of equity instruments classified as available for sale are recognised in the fair value reserve.

Recognition and derecognition of financial assets and financial liabilities

A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised where:

- the rights to receive cash flows from the asset have expired, or
- the group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass through' arrangement, or
- the group has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the group has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the group's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the group could be required to repay.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability.

Financial guarantees

In the ordinary course of business, the group gives financial guarantees, consisting of letters of credit, guarantees and acceptances. Financial guarantees are initially recognised in the consolidated financial statements at fair value, being the premium received, in other liabilities. The premium received is recognised in the statement of income in 'net fees and commissions' on a straight line basis over the life of the guarantee. The guarantee liability is subsequently carried at initial measurement less amortisation. When a payment under the guarantee is likely to become payable, the present value of the expected payments less the unamortised premium, is charged to the consolidated income statement.

Leased assets

This represents net investment in assets leased for periods which either approximate or cover a major part of the economic lives of such assets. The lease agreements provide a purchase option to lessees at a price equal or expected to be equal or lower than fair value of such assets at the time when such option is exercised.

Leased assets are stated at amounts equal to the net investment outstanding in the leases.

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

Available for sale investments

Investments are initially recognised at cost (including transaction costs associated with the acquisition of the investment) and are subsequently remeasured to fair value unless fair value cannot be reliably determined. Changes in fair value are reported in the fair value reserve until the investment is sold, collected or otherwise disposed off, or the investment is determined to be impaired, at which time the cumulative gain or loss previously included within the fair value reserve is included within investment income in the consolidated income statement.

Investments in associates

An associate is an entity over which the group exerts significant influence. Investments in associates are accounted for under the equity method of accounting. Where an associate is acquired and held exclusively for resale, it is accounted for as a non-current asset held for resale under IFRS 5.

Under the equity method, the investment in associate is initially recognised at cost and adjusted thereafter for the post-acquisition change in the group's share of the associate's equity. Goodwill relating to an associate is included in the carrying amount of the investment and is not amortised. The group recognises in the consolidated income statement its share of the total recognised profit or loss of the associate from the date that influence effectively commenced until the date that it effectively ceases. Distributions received from the associate reduce the carrying amount of the investment. Adjustments to the carrying amount may also be necessary for changes in the group's share in the associate arising from changes in the associate's equity. The group's share of those changes is recognised directly in equity, fair value reserve or foreign exchange translation reserve as appropriate.

Unrealised gains on transactions with associate are eliminated to the extent of the group's share in the associate. Unrealised losses are also eliminated unless the transaction provides evidence of impairment in the asset transferred. An assessment for impairment of investments in associates is performed when there is an indication that the asset has been impaired, or that impairment losses recognised in prior years no longer exist.

The associate's financial statements are prepared either to the bank's reporting date or to a date not earlier than three months of the bank's reporting date using consistent accounting policies. Where practicable, adjustments are made for the effects of significant transactions or other events that occur between the reporting date of the associates and the bank's reporting date.

Trading properties

Trading properties are carried at the lower of cost or market value determined on an individual basis.

Investment properties

Investment properties are initially recorded at cost including associated transaction costs. Depreciation is provided on a straight-line basis over the estimated useful lives of all rental properties other than freehold land which is deemed to have an indefinite life.

Impairment of non-financial assets

The group assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the group makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets and then its recoverable amount is assessed as part of the cash-generating unit to which it belongs. Where the carrying amount of an asset (or cash-generating unit) exceeds its recoverable amount, the asset (or cash-generating unit) is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or cash-generating unit). In determining fair value less costs to sell an appropriate valuation model is used. These calculations are corroborated by available fair value indicators.

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

Impairment of non-financial assets (continued)

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is asset's recoverable amount since the last impairment loss was recognised. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the consolidated income statement. After such a reversal, the depreciation charge is adjusted in future years to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Property and equipment

Property and equipment are stated at historical cost less accumulated depreciation and any impairment in value. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the consolidated income statement during the financial period in which they are incurred.

Freehold land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives, as follows:

- Aircraft and engines 18 years (from the date of original manufacture)
- Buildings 20 years
- Motor vehicles 3 years
- Furniture, fixtures and equipment 3-5 years

The asset's residual values, useful lives and methods of depreciation are reviewed, and adjusted if appropriate, at each financial year end.

Fair values

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. Consequently differences can arise between carrying values and the fair value estimates.

Underlying the definitions of fair value is the presumption that the group is a going concern without any intention or requirement to materially curtail the scale of its operations or to undertake a transaction on adverse terms.

Investments

For investments traded in organised financial markets, fair value is determined by reference to stock exchange quoted market bid prices at the close of business on the balance sheet date.

For investments where there is no quoted market price, a reasonable estimate of the fair value is determined by reference to recent arm's length transactions, current fair value of another instrument that is substantially the same, an earnings multiple, or an industry specific earnings multiple or is based on the expected cash flows of the investment discounted at current rates applicable for items with similar terms and risk characteristics. Fair value estimates take into account liquidity constraints and assessment for any impairment.

Investments with no reliable measures of their fair values and for which no fair value information could be obtained are carried at their initial cost less impairment in value, if any.

Investment properties

For local investment properties, fair value is determined by the group's specialist resources which have relevant experience in the local property market. For overseas investment properties, fair value is determined based on external valuations by independent, registered real estate valuers.

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair values (continued)

Other financial assets and liabilities

For other financial assets and liabilities, fair value is determined based on expected future cash flows and management's estimate of the amount at which these assets could be exchanged for cash on an arm's length basis or a liability settled to the satisfaction of creditors.

IFRS 2 "Share-Based Payment"

IFRS 2 "Share-Based Payment" requires an expense to be recognised where the group buys goods or services in exchange for shares or rights over shares ("equity-settled transactions"), or in exchange for other assets equivalent in value to a given number of shares or rights over shares ("cash-settled transactions").

Share-based payment transactions

Entitled employees (including directors) of the group receive remuneration in the form of share-based payment transactions, whereby entitled employees render services in exchange for shares or rights over shares ("equity-settled transactions").

Equity-settled transactions

The cost of equity-settled transactions with employees is measured under the intrinsic value method. Under this method, the cost is determined by comparing the fair value of the granted shares at each reporting date and the date of final settlement to the exercise price with any change in intrinsic value recognised in the consolidated income statement.

The cost of equity settled transactions is recognised, together with a corresponding increase in equity, over the period in which the performance conditions are fulfilled, ending on the date on which the relevant employees exercise their rights. The cumulative expense recognised for equity-settled transactions at each reporting date until the exercise date reflects the extent to which the exercise period has expired and the number of awards that, in the opinion of the Board of Directors at that date, based on the best available estimate of the number of equity instruments that will ultimately vest.

Revenue recognition

- i) Income from murabaha and istisna'a is recognised on a weighted time apportionment basis.
- ii) Income from leased assets is recognised on a pattern reflecting a constant periodic return on the net investment outstanding.
- iii) Operating lease income is recognised on a straight line basis in accordance with the lease agreement.
- iv) Rental income from investment properties is recognised on an accruals basis.
- v) Dividend income, including dividend income on own shares (held on behalf of depositors), is recognised when the right to receive payment is established.
- vi) Fee and commission income is recognised at the time the related services are provided.

Zakat

In accordance with its internal guidelines, the bank calculates Zakat at 2.577% on the opening reserves of the bank (excluding proposed distributions) which have remained for one complete fiscal year and is paid under the direction of the bank's Al-Fatwa and Shareea'a Supervisory Board. Such Zakat is charged to voluntary reserve.

In addition, effective from 10 December 2007, the bank has also provided for Zakat in accordance with the requirements of Law No. 46 of 2006. The Zakat charge calculated in accordance with these requirements is charged to the consolidated income statement.

Foreign currency translation

The consolidated financial statements are presented in Kuwaiti Dinars, which is the bank's functional and presentational currency. Each entity in the group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

Transactions and balances

Transactions in foreign currencies are initially recorded in the functional currency rate of exchange ruling at the date of the transaction.

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

Foreign currency translation (continued)

Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the balance sheet date. All differences are taken to general and administrative expenses in the consolidated income statement.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition are treated as assets and liabilities of the foreign operations and translated at closing rate.

Group companies

As at the reporting date, the assets and liabilities of foreign subsidiaries are translated into the bank's presentation currency (the Kuwaiti Dinars) at the rate of exchange ruling at the balance sheet date, and their income statements are translated at the weighted average exchange rates for the year except for entities operating in hyper inflationary economies. The results of entities operating in hyper inflationary economies are translated into the bank's presentation currency at period end exchange rates. Exchange differences arising on translation are taken directly to foreign exchange translation reserve. On disposal of a foreign entity, the deferred cumulative amount recognised in equity relating to the particular foreign operation is recognised in the consolidated income statement.

On equity accounting, the carrying value of the associates is translated into the bank's presentation currency at the period end rates of exchange and the results of the associates are translated into Kuwaiti dinars at the average rates of exchange for the year. All foreign exchange translation adjustments are taken to the foreign exchange translation reserve until disposal at which time they are recognised in the consolidated income statement.

Trade and settlement date accounting

All "regular way" purchases and sales of financial assets are recognised on the trade date, i.e. the date that the group commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place.

Offsetting

Financial assets and financial liabilities are only offset and the net amount reported in the consolidated balance sheet when there is a legally enforceable right to set off the recognised amounts and the group intends to settle on a net basis so as to realise the assets and liabilities simultaneously.

Cash and cash equivalents

Cash and cash equivalents comprise cash, tawarruq balances with the Central Bank of Kuwait, balances with banks and financial institutions and international murabaha contracts and exchange of deposits maturing within three months of contract date.

Fiduciary assets

Assets held in trust or in a fiduciary capacity are not treated as assets of the group and accordingly are not included in the consolidated balance sheet.

Judgements

In the process of applying the group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognised in the consolidated financial statements:

Classification of investments

Management decides on acquisition of an investment whether it should be classified as held to maturity, held for trading, carried at fair value through profit and loss account, or available for sale.

The group classified all of its investments as available for sale.

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

Judgements (continued)

Impairment of investments

The group treats available for sale equity investments as impaired when there has been a significant or prolonged decline in the fair value below its cost or where other objective evidence of impairment exists. The determination of what is "significant" or "prolonged" requires considerable judgement. In addition, the group evaluates other factors, including normal volatility in share price for quoted equities and the future cash flows and the discount factors for unquoted equities.

Classification of real estate property

Management decides on acquisition of a real estate property whether it should be classified as trading, investment property or under development

The group classifies property as trading property if it is acquired principally for sale in the ordinary course of business.

The group classifies property as investment property if it is acquired to generate rental income or for capital appreciation, or for undetermined future use.

The group classifies property as property under development if it is acquired with the intention of development.

Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

Impairment losses on finance facilities

The group reviews its problem finance facilities on a quarterly basis to assess whether a provision for impairment should be recorded in the consolidated income statement. In particular, considerable judgement by management is required in the estimation of the amount and timing of future cash flows when determining the level of provisions required. Such estimates are necessarily based on assumptions about several factors involving varying degrees of judgment and uncertainty, and actual results may differ resulting in future changes to such provisions.

Valuation of unquoted equity investments

Valuation of unquoted equity investments is normally based on one of the following:

- recent arm's length market transactions;
- current fair value of another instrument that is substantially the same;
- an earnings multiple
- the expected cash flows discounted at current rates applicable for items with similar terms and risk characteristics; or
- other valuation models.

The determination of the cash flows and discount factors for unquoted equity investments requires significant estimation. There are a number of investments where this estimation cannot be reliably determined. As a result, these investments are carried at cost less impairment.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2007

3 INVESTMENT INCOME

	<i>2007</i> <i>KD 000's</i>	<i>2006</i> <i>KD 000's</i>
Income from sale of trading properties	43,279	25,610
Rental income	15,962	11,516
Dividend income	24,326	28,467
Gain on part sale of associates by subsidiaries (Note 10)	62,955	2,092
Gain on part sale of subsidiaries	14,018	9,289
Gain on sale of available for sale investments	59,395	49,165
Share of results of associates (Note 10)	45,422	51,085
Other investment income	1,040	6,025
	<u>266,397</u>	<u>183,249</u>

During the year, the bank disposed of its entire investment in one of its real estate funds and recorded a gain of KD 27,570 thousand after retaining KD 16,288 thousand for taxation and other expenses pending finalisation of tax liability with the concerned tax authorities (included within gain on sale of available for sale investments).

4 PROVISION FOR IMPAIRMENT

	<i>2007</i> <i>KD 000's</i>	<i>2006</i> <i>KD 000's</i>
Provision for impairment of receivables :		
International murabahas	(992)	1,709
Local murabahas	9,831	16,510
Istisna'a and other receivables	8,542	(2,780)
	<u>17,381</u>	<u>15,439</u>
Provision for impairment of leased assets	6,252	1,560
Provision for impairment of available for sale investments	7,001	-
Provision for impairment of other assets	7,545	10,181
	<u>38,179</u>	<u>27,180</u>

5 EARNINGS PER SHARE ATTRIBUTABLE TO THE EQUITY HOLDERS OF THE BANK

Basic and diluted earnings per share are based on the profit for the year attributable to equity holders of the bank of KD 275,266 thousand (2006: KD 162,004 thousand) and the weighted average number of ordinary shares outstanding during the year of 1,656,143 thousand (2006: 1,581,698 thousand) excluding the weighted average number of treasury shares held by the group.

The earnings per share of the previous year has been restated for the bonus and rights issue shares during the year ended 31 December 2007.

The distributable earnings per share of the current year after adjustment for the impact of the capital increase from 1 January 2007 and bonus shares issued during 2007 was 161 fils per share.

6 CASH AND CASH EQUIVALENTS

	2007 KD 000's	2006 KD 000's
Cash	38,630	45,901
Balances with Central Banks	350,398	141,942
Balances with banks and financial institutions - current accounts	84,379	42,880
Balances with banks and financial institutions - exchange of deposits	80,158	1,273
Cash and balances with banks and financial institutions	553,565	231,996
Short-term international murabaha – maturing within 3 months of contract date	157,945	428,390
Tawarruq balances with Central Bank of Kuwait (included within short-term international murabaha)	149,519	222,755
Exchange of deposits – maturing after 3 months of contract date	(6,224)	-
Cash and cash equivalents	854,805	883,141

The group exchanges deposits with high credit quality banks and financial institutions in local and foreign currencies with the legal right reserved to set off such deposits exchanged in the event that a counter party bank or financial institution becomes insolvent. The gross balances of deposits exchanged were as follows:

	2007 KD 000's	2006 KD 000's
Due from banks and financial institutions	167,587	168,589
Due to banks and financial institutions	(87,429)	(234,995)
	80,158	(66,406)

Included in the consolidated balance sheet as net balances:

	2007 KD 000's	2006 KD 000's
In assets:		
Cash and balances with banks and financial institutions – exchange of deposits	80,158	1,273
In liabilities:		
Due to banks and financial institutions – exchange of deposits (Note 13)	-	(67,679)
	80,158	(66,406)

The fair values of cash and balances with banks and financial institutions do not differ from their respective book values.

7 RECEIVABLES

Receivables principally comprise murabaha and istisna'a balances and are stated net of provision for impairment as follows:

	2007 KD 000's	2006 KD 000's
International murabahas	813,330	666,722
Local murabahas	2,955,664	2,023,715
Istisna'a and other receivables	370,492	252,184
	4,139,486	2,942,621
Less: provision for impairment	(151,355)	(164,455)
	3,988,131	2,778,166

Kuwait Finance House K.S.C. and Subsidiaries

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2007

7 RECEIVABLES (continued)

At 31 December 2007, non-performing finance facilities amounted to KD 109,179 thousand (2006: KD 120,244 thousand) and are split between facilities granted pre-invasion and post liberation as follows:

	<i>Pre-invasion</i> KD 000's	<i>Post liberation</i> KD 000's	<i>Total</i> KD 000's
2007			
Finance facilities	6,368	102,811	109,179
Provisions	6,368	71,866	78,234
2006			
Finance facilities	31,693	88,531	120,224
Provisions	31,693	67,954	99,647

The provision charge for the year on unfunded facilities is KD 134 thousand (2006: KD 1,362 thousand). The available provision on unfunded facilities of KD 6,684 thousand (2006: KD 6,550 thousand) is included under other liabilities.

The analysis of specific and general provisions set out above is based on the requirements of the Central Bank of Kuwait. In March 2007, the Central Bank of Kuwait issued a circular amending the basis of making general provisions on facilities changing the rate from 2% to 1% for cash facilities and from 2% to 0.5% for non cash facilities. The required rates were to be applied effective from 1 January 2007 on the net increase in facilities, net of certain restricted categories of collateral, during the reporting period. The general provision in excess of the present 1% for cash facilities and 0.5% for non cash facilities would be retained as a general provision until a further directive from the Central Bank of Kuwait is issued.

Provisions include certain amounts purchased by the Central Bank of Kuwait. Such provisions must be ceded to the Central Bank of Kuwait when they are no longer required.

Whenever necessary, murabaha receivables are secured by acceptable forms of collateral to mitigate the related credit risks. Real estate murabaha receivables are secured by mortgage on the underlying property.

Receivables from banks and financial institutions comprise mainly murabaha transactions with high credit quality institutions.

The fair values of receivables do not differ from their respective book values.

8 LEASED ASSETS

The net investment in leased assets comprises the following:

	<i>2007</i> KD 000's	<i>2006</i> KD 000's
Gross investment	995,356	695,235
Unearned revenue	(45,911)	(34,210)
Provision for impairment	(18,788)	(13,086)
	<u>930,657</u>	<u>647,939</u>

The future minimum lease payments receivable in the aggregate are as follows:

	<i>2007</i> KD 000's	<i>2006</i> KD 000's
Within one year	589,539	355,679
One to five year	275,887	267,350
After five years	129,930	72,206
	<u>995,356</u>	<u>695,235</u>

The unguaranteed residual value of the leased assets at 31 December 2007 is estimated at KD Nil (2006: KD Nil).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2007

9 AVAILABLE FOR SALE INVESTMENTS

	2007 KD 000's	2006 KD 000's
Available for sale investments comprise:		
Quoted equity investments	81,253	68,612
Unquoted equity investments	270,034	143,721
Managed portfolios (comprising quoted equity investments)	173,836	69,484
Mutual funds	109,343	150,528
Sukook	261,632	151,006
	<u>896,098</u>	<u>583,351</u>
Investments carried at fair value	544,664	300,845
Investments carried at cost less impairment	351,434	282,506
	<u>896,098</u>	<u>583,351</u>

Included in managed portfolios is an amount of KD 36,535 thousand (2006: KD 20,045 thousand) which represents the group's investment in 12,956 thousand (2006: 9,280 thousand) of the bank's shares on behalf of depositors, equivalent to 0.76% of the total issued share capital at 31 December 2007 (2006: 0.76%). The results from activities relating to dealing in these shares are attributed only to the depositors, and hence these shares are classified under investments.

10 INVESTMENT IN ASSOCIATES

The group's associates primarily consist of the following:

	Interest in equity %		Country of registration	Principal activities	Financial statements reporting date
	2007	2006			
<i>Direct investments in associates:</i>					
First Takaful Insurance Company K.S.C. (Closed)	27	27	Kuwait	Islamic Takaful insurance	30 September 2007

Included in property and equipment are the head office building and all branches of the bank constructed on land leased from the Government of Kuwait. The ownership of the buildings as well as the net rental income from these buildings are attributable only to the equity holders of the bank.

Buildings include the investment in Al-Muthana Complex in Kuwait which is constructed on land leased from the Government of Kuwait. The ownership of the building, as well as any results from the activities relating to the complex, are attributed only to the equity holders of the bank.

One of the subsidiaries holds aircraft with carrying value of KD 162,580 thousand acquired under finance leases. The aircraft are secured against the finance leases with the legal title of the aircraft being retained by the lender (Note 13).

The residual value of the aircraft fleet of a subsidiary is estimated at approximately 30% (in aggregate) of the purchase cost of the aircraft fleet.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2007

12 PROPERTY AND EQUIPMENT (continued)

The future minimum lease rent receivable on the operating lease of motor vehicles, aircraft and engines is KD 154,083 thousand (2006: KD 174,611 thousand) and is receivable as follows:

	2007 KD 000's	2006 KD 000's
Income receivable within one year	29,740	31,233
Income receivable within one year to five years	85,404	86,552
Income receivable after five years	38,939	56,826
	<u>154,083</u>	<u>174,611</u>

13 DUE TO BANKS AND FINANCIAL INSTITUTIONS

	2007 KD 000's	2006 KD 000's
Current accounts	4,772	3,831
Murabaha payable	1,069,823	890,518
Exchange of deposits (Note 6)	-	67,679
Obligations under finance leases (Note 12)	111,796	117,976
	<u>1,186,391</u>	<u>1,080,004</u>

The fair values of balances due to banks and financial institutions do not differ from their respective book values.

Property and equipment include 14 aircraft acquired by a subsidiary under finance leases denominated in US Dollars with maturities varying between 5 and 12 years. The finance leases bear effective finance costs of 4.6% - 6.6% per annum and are secured by the aircraft (Note 12). The instalments payable within one to five years are KD 48,194 thousand and instalments payable after five years are KD 65,814 thousand.

14 DEPOSITORS' ACCOUNTS

a) The depositors' accounts of the bank comprise the following:

- i) Non-investment deposits in the form of current accounts. These deposits are not entitled to any profits nor do they bear any risk of loss as the bank guarantees to pay the related balances on demand. Accordingly, these deposits are considered Qard Hasan from depositors to the bank on the grounds of Islamic Shareea'a.
- ii) Investment deposits comprise Mustamera and Al-Sedra deposits for unlimited periods and Tawfeer savings accounts. Unlimited investment deposits are initially valid for one year and are automatically renewable for the same period unless notified to the contrary in writing by the depositor. Investment savings accounts are valid for an unlimited period.

In all cases, the investment deposits receive a proportion of the profit as the board of directors of the bank determines, or bear a share of loss based on the results of the financial year.

The bank generally invests approximately 90% of investment deposits for an unlimited period ("Mustamera"), 70% of investment deposits for an unlimited period ("Al-Sedra") and 60% of investment savings accounts ("Tawfeer"). The bank guarantees to pay the remaining uninvested portion of these investment deposits. Accordingly, this portion is considered Qard Hasan from depositors to the bank, on the grounds of Islamic Shareea'a. Investing such Qard Hasan is made at the discretion of the board of directors of the bank, the results of which are attributable to the equity holders of the bank.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2007

14 DEPOSITORS' ACCOUNTS (continued)

- b) On the basis of the results for the year, the board of directors of the bank have determined the depositors' share of profit at the following rates:

	2007 % per annum	2006 % per annum
Investment deposits - ("Mustamera")	8.632	8.458
Investment deposits - ("Al-Sedra")	6.714	6.578
Investment savings accounts ("Tawfeer")	5.755	5.639

- c) The fair values of depositors' accounts do not differ from their carrying book values.

15 FAIR VALUE RESERVE

Changes in the fair value of available for sale investments are reported in the fair value reserve. Management of the bank is of the opinion that this reserve is attributable to both the depositors and equity holders. As a result, the reporting of this reserve as a separate item on the consolidated balance sheet enables a fairer presentation than its inclusion within equity attributable to the equity holders of the bank.

The movement on the fair value reserve is analysed as follows:

	2007 KD 000's	2006 KD 000's
Balance at 1 January	66,645	62,092
Change in fair value during the year	38,011	9,486
Gain realised during the year	(17,864)	(7,697)
Share of changes in associates' fair value reserves (Note 10)	51	2,773
Balance at 31 December	<u>86,843</u>	<u>66,654</u>

Unrealised gains on revaluation of available for sale investments recognised directly in fair value reserve include KD 1,206 thousand (31 December 2006: KD 497 thousand) relating to unquoted equity investments resulting from the use of acceptable valuation techniques.

16 FOREIGN EXCHANGE TRANSLATION RESERVE

The foreign exchange translation reserve arises on the consolidation of foreign subsidiaries and equity accounting of foreign associates. Management of the bank is of the opinion that this reserve is attributable to both the depositors and equity holders. As a result, the reporting of this reserve as a separate item on the consolidated balance sheet enables a fairer presentation than its inclusion within equity attributable to the equity holders of the bank.

17 SHARE CAPITAL

Following approval of the ordinary and extraordinary general assembly meeting of the equityholders of the bank held on 19 February 2007, the authorised share capital of the bank was increased from KD 122,525 thousand to KD 171,535 thousand by way of issuance of 15% bonus shares amounting to KD 18,379 thousand and by issuance of 306,312 thousand rights shares with a nominal value of 100 fils per share amounting to KD 30,631 thousand plus premium of 900 fils per share amounting to KD 275,681 thousand. Accordingly, the authorised, issued and fully paid-up share capital at 31 December 2007, comprises 1,715,350 thousand shares (31 December 2006: 1,225,250 thousand shares) of 100 fils each.

18 PROPOSED CASH DIVIDEND, ISSUE OF BONUS SHARES AND DIRECTORS' FEES

The board of directors of the bank have proposed a cash dividend of 65% for the year ended 31 December 2007 (2006: 57%) and issuance of bonus shares of 20% (2006: 15%) of paid up share capital. This proposal is subject to the approval of the ordinary general assembly of the equity holders of the bank and completion of legal formalities. Proposed dividends are shown separately within equity.

Directors' fees of KD 200 thousand (2006: KD 150 thousand) are within the amount permissible under local regulations and are subject to approval by the annual general assembly of the equity holders of the bank.

19 RESERVES

In the ordinary and extraordinary general assembly meeting of the equity holders of the bank held on 14 March 2005, the ordinary general assembly resolved to suspend transfers to statutory reserve in excess of 10%. The extraordinary general assembly of the bank held on 18 March 1996 approved an amendment to article 58 of its articles of association, in which the Ordinary General Assembly can approve an increase in the transfer of 10% each of the profit for the year attributable to the equity holders of the bank to statutory and voluntary reserves, as appropriate, if proposed by the board of directors of the bank. As a result, an amount of KD 28,474 thousand equivalent to approximately 10% (2006: KD 16,729 thousand equivalent to approximately 10%), of the profit for the year (before contribution to Kuwait Foundation for the Advancement of Sciences, National Labour Support tax, Zakat and Directors' fees) has been transferred to statutory reserve.

Only that part of the statutory reserve in excess of 50% of paid-up share capital is freely distributable and usable at the discretion of the ordinary general assembly in ways that may be deemed beneficial to the bank. Distribution of the balance of the statutory reserve is limited to the amount required to enable the payment of a dividend of 5% of paid-up share capital to be made in years when accumulated profits are not sufficient for the payment of a dividend of that amount.

35% (2006: 34%) of the profit for the year attributable to the equity holders of the bank (before contribution to Kuwait Foundation for the Advancement of Sciences, Directors' fees, Zakat and National Labour Support tax) has been transferred to voluntary reserve.

The share premium account is not available for distribution.

24 CONCENTRATION OF ASSETS AND LIABILITIES

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the group's performance to developments affecting a particular industry or geographic location.

(a) The distribution of assets by industry sector was as follows:

	<i>2007</i>	<i>2006</i>
	<i>KD 000's</i>	<i>KD 000's</i>
Trading and manufacturing	2,837,886	1,987,213
Banks and financial institutions	2,463,631	1,864,658

25 FOREIGN CURRENCY EXPOSURE

The group had the following significant net exposures denominated in foreign currencies as of 31 December:

	<i>2007</i> <i>KD 000's</i> <i>Equivalent</i> <i>Long (short)</i>	<i>2006</i> <i>KD 000's</i> <i>Equivalent</i> <i>Long (short)</i>
U.S. Dollars	103,231	(92,593)
Sterling Pounds	26,800	26,167
Euros	(2,046)	19,464
Gulf Cooperation Council currencies	25,758	20,792
Others	55,802	24,857

26 RISK MANAGEMENT

Risk management is an integral part of the group's decision-making process. It is managed through a risk management committee, comprising members of senior management drawn from all key areas of the group, who guide and assist with overall management of the Group's risks. Each individual within the Group is accountable for the risk exposures relating to their responsibilities. The Group is exposed to liquidity risk, credit risk, concentration risk, profit return risk, equity price risk and currency risk.

The group has an independent process whereby risks are identified, measured and monitored. The risk management unit is responsible for this process. The head of risk management has independent access to the board of directors.

a) Risk management structure*Board of directors*

The board of directors of the bank is responsible for the overall risk management approach and for approving risk strategies and principles.

The board of directors of the bank receives a comprehensive risk report once a quarter which is designated to provide all the necessary information to assess and conclude on the risks of the group.

Risk management committee

The bank's risk management committee has the overall responsibility for development of a risk strategy and implementing principles, frameworks, policies and limits. It is responsible for fundamental risk issues and manages and monitors relevant risk exposures.

Risk management unit

The bank's risk management unit is responsible for implementing and maintaining risk related procedures to ensure an independent control process and includes monitoring the risk of exposures against limits.

Treasury

Treasury is responsible for managing the bank's assets and liabilities, and the overall financial statement. It is also responsible for funding and liquidity management.

26 RISK MANAGEMENT (continued)

b) Risk management and reporting systems

The risk management committee is responsible for managing and monitoring risk exposures. The risk management unit measures risk through the use of risk models and provides reports to the risk management committee. The models use probabilities based on historical experiences adjusted to reflect the economic environment.

Monitoring and controlling risks are managed through limits set by the board of directors. These limits reflect the business strategy and market environment of the group as well as the level of risk that the bank's board of directors is willing to accept.

Risk mitigation

As part of its overall risk management, the bank uses proper instruments to manage exposures resulting from changes in yields, foreign currencies, equity risks and credit risks. The bank actively uses collateral to reduce its credit risks.

Excessive risk concentration

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the bank's performance to developments affecting a particular industry or geographical location.

In order to avoid excessive concentrations of risk, the bank's policies and procedures include specific guidelines to focus on maintaining a diversified portfolio. Identified concentrations of credit risks are controlled and managed accordingly. Selective hedging is used within the bank to manage risk concentrations at both the relationship and industry levels.

In addition, each of the banking subsidiaries of the bank, has similar risk management structures, policies and procedures as noted for the bank above which are overseen by the bank's board of directors.

27 CREDIT RISK

Credit risk is the risk that the group will incur a loss because its customers, clients or counterparties failed to discharge their contractual obligations. The group manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentrations, and by monitoring exposures in relation to such limits.

The group has established a decentralised credit quality review process to provide early identification of possible changes in the creditworthiness of counterparties, including regular collateral revisions. Counterparty limits are established by the use of a credit risk classification system, which assigns each counterparty a risk rating. Risk ratings are subject to regular revision. The credit quality review process allows the group to assess the potential loss as a result of the risks to which it is exposed and take corrective action.

Credit-related commitments risks

The group makes available to its customers guarantees which may require that the group makes payments on their behalf. Such payments are collected from customers based on the terms of the letter of credit. They expose the group to similar risks to finance facilities and these are mitigated by the same control processes and policies.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2007

27 CREDIT RISK (continued)

Maximum exposure to credit risk without taking account of any collateral

The table below shows the maximum exposure to credit risk for the components of the balance sheet. The maximum exposure is shown gross, before the effect of mitigation through the use of master netting and collateral agreements.

	<i>Notes</i>	<i>Gross maximum exposure 2007 KD 000's</i>	<i>Gross maximum exposure 2006 KD 000's</i>
Cash and balances with groups and financial institutions (excluding cash on hand)	6	514,935	186,095
Short-term international murabaha		1,067,291	1,050,599
Receivables	7	3,988,131	2,778,166
Leased assets	8	930,657	647,939
Available for sale investments	9	261,632	151,006
Other assets		215,451	118,629
Total		6,978,097	4,932,434
Contingent liabilities		1,037,310	562,031
Commitments		1,261,559	667,406
Total		2,298,869	1,229,437
Total credit risk exposure		9,276,966	6,161,871

Where financial instruments are recorded at fair value, the amounts shown above represent the current credit risk exposure but not the maximum risk exposure that could arise in the future as a result of changes in values.

Risk concentrations of the maximum exposure to credit risk

Concentration of risk is managed by client by geographical region and by industry sector. The maximum credit exposure to a customer as of 31 December 2007 was KD 109,149 thousands (2006: KD 63,706 thousands) before taking account of collateral or other credit enhancements and KD 109,149 thousands (2006: KD 63,706 thousands) net of such protection.

The group's on-balance sheet financial assets, before taking into account any collateral held can be analysed by the following geographical regions:

	<i>Banking KD 000's</i>	<i>Non- banking KD 000's</i>	<i>Total 2007 KD 000's</i>	<i>Banking KD 000's</i>	<i>Non- banking KD 000's</i>	<i>Total 2006 KD 000's</i>

Collateral

The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines established by the bank's risk management and credit committee are implemented regarding the acceptability of types of collateral and valuation parameters.

The main types of collateral accepted include real estate, quoted shares, cash and bank guarantees. The group also obtains guarantees from parent companies for finance facilities extended to their subsidiaries.

Management monitors the market value of collateral, requests additional collateral in accordance with the underlying agreements, and monitors the market value of collateral obtained during its review of the adequacy of the allowance for impairment losses.

The fair value of collateral that the group holds relating to finance facilities individually determined to be impaired at 31 December 2007 amounts to KD 45,484 thousand (2006: KD 56,832 thousand). The collateral consists of cash, securities, letters of guarantee and real estate assets.

The fair value of collateral that the group holds relating to finance facilities past due but not impaired as at 31 December 2007 was KD 244,818 thousand (2006: KD 155,582 thousand).

At 31 December 2007

28 LIQUIDITY RISK

Liquidity risk is the risk that the bank will be unable to meet its payment obligations when they fall due under normal and stress circumstances. To limit this risk, management has arranged diversified funding sources in addition to its core deposit base, manages assets with liquidity in mind, and monitors future cash flows and liquidity on a daily basis. This incorporates an assessment of expected cash flows and the availability of high grade collateral which could be used to secure additional funding if required.

The bank maintains a portfolio of highly marketable and diverse assets that can be easily liquidated in the event of an unforeseen interruption of cash flow. The bank also has committed lines of credit that it can access to meet liquidity needs. The liquidity position is assessed and managed under a variety of scenarios, giving due consideration to stress factors relating to both the market in general and specifically to the bank. The most important of these is to maintain limits on the ratio of net liquid assets to customer liabilities, set to reflect market conditions. Net liquid assets consist of cash and short term murabaha. The ratio during the year was as follows:

	<i>2007</i>	<i>2006</i>
	%	%
31 December	26	33
Average during the period	33	27
Highest	42	33
Lowest	26	21

The table below summarises the maturity profile of the group's assets and liabilities. The contractual maturities of assets and liabilities have been determined on the basis of the remaining period at the balance sheet date to the contractual maturity date and do not take account of the effective maturities as indicated by the group's deposit retention history and the availability of liquid funds. The maturity profile is monitored by management to ensure adequate liquidity is maintained. The maturity profile of the assets and liabilities at the year end are based on contractual repayment arrangement with the exception of available for sale investments and investment properties which are based on planned exit dates.

The bank expects that not all of the contingent liabilities or commitments will be drawn before expiry of the commitments.

At 31 December 2007

29 MARKET RISK

Market risk is the risk that the value of an asset will fluctuate as a result of changes in market prices.

Market risk is managed on the basis of pre-determined asset allocations across various asset categories, a continuous appraisal of market conditions and trends and management's estimate of long and short term changes in fair value.

The group is not exposed to any risk in terms of the repricing of its liabilities since the group does not provide contractual rates of return to its depositors in accordance with Islamic Shareea'a.

Non-trading market risk***Interest rate risk***

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. The group is not exposed to interest rate risk as the bank does not charge interest. Changes in interest rates may, however, affect the fair value of available for sale investments.

Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates.

Currency risk is managed on the basis of limits determined by the bank's board of directors and a continuous assessment of the group open positions, and current and expected exchange rate movements. The group, where necessary, matches currency exposures inherent in certain assets with liabilities in the same or a correlated currency.

The tables below indicate the currencies to which the bank had significant exposure at 31 December 2007 on its non-trading monetary assets and liabilities and its forecast cash flows. The analysis calculates the effect of a reasonably possible movement of the currency rate against the Kuwaiti Dinar, with all other variables held constant on the profit and the fair value reserve (due to the change in fair value of available for sale investments).

<i>Currency</i>	<i>Change in currency rate in % 2007</i>	<i>Effect on profit 2007 KD 000's</i>	<i>Effect on fair value reserve 2007 KD 000's</i>	<i>Change in currency rate in % 2006</i>	<i>Effect on profit 2006 KD 000's</i>	<i>Effect on fair value reserve 2006 KD 000's</i>
USD	-2%	2,065	1,942	-0.98%	907	-492
GBP	+2%	536	59	12.7%	3,323	321

The comparative change in currency is based on the actual change in the value of the currencies in that year.

At 31 December 2007

29 MARKET RISK (continued)**Equity price risk**

Equity price risk is the risk that the fair values of equities decrease as the result of changes in the levels of equity indices and the value of individual stocks. The non-trading equity price risk exposure arises from the group's investment portfolio. The group manages this risk through diversification of investments in terms of geographical distribution and industry concentration.

The effect on fair value reserve (as a result of a change in the fair value of available for sale investments at 31 December 2006) due to a reasonably possible change in equity indices, with all other variables held constant, is as follows:

	<i>Change in equity price 2007 %</i>	<i>Effect on fair value reserve 2007 KD 000's</i>	<i>Change in equity price 2006 %</i>	<i>Effect on fair value reserve 2006 KD 000's</i>
<i>Market indices</i>				
KSE	-10	(16,727)	-12	(11,506)
Other GCC indices	+12	905	+1	48
Unquoted	+2	146	+2	220

The comparative change in price of equity indices is based on the actual change in the equity price indices in that year.

Operational risk

Operational risk is the risk of loss arising from systems failure, human error, fraud or external events. When controls fail to perform, operational risks can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. The bank cannot expect to eliminate all operational risks, but through a control framework and by monitoring and responding to potential risks, the bank is able to manage the risks. Controls include effective segregation of duties, access, authorisation and reconciliation procedures, staff education and assessment processes, including the use of internal audit.

The bank has a set of policies and procedures, which is approved by its board of directors and applied to identify, assess and supervise operational risk in addition to other types of risks relating to the banking and financial activities of the bank. Operational risk is managed by the operational risk function, which ensures compliance with policies and procedures and monitors operational risk as part of overall bank wide risk management.

The operational risk function of the bank is in line with the CBK instructions concerning the general guidelines for internal controls and the sound practices for managing and supervising operational risks in banks.

30 CAPITAL MANAGEMENT

The primary objectives of the group's capital management are to ensure that the group complies with regulatory capital requirements and that the group maintains strong credit ratings and healthy capital ratios in order to support its business and to maximise shareholders' value.

The group manages its capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the group may review the amount of dividend payment to shareholders or issue capital securities. No changes were made in the objectives, policies and processes from the previous years.

Kuwait Finance House K.S.C. and Subsidiaries

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2007

30 CAPITAL MANAGEMENT (continued)

Capital adequacy

	<i>Actual 2007 KD 000's</i>	<i>Actual 2006 KD 000's</i>
Tier 1 capital	1,294,594	754,165
Tier 2 capital	25,245	21,677
Total capital	1,319,839	775,842
Risk weighted assets	5,674,430	4,110,003
Total capital ratio	23%	19%
Minimum total capital ratio (required by the CBK)	12%	12%

Regulatory capital consists of Tier 1 capital, which comprises share capital, share premium, foreign currency translation and minority interests less dividends and treasury shares. Certain adjustments are made to IFRS-based results and reserves, as prescribed by the Central Bank of Kuwait. The other component of regulatory capital is Tier 2 capital, which includes fair value reserve and foreign currency translation reserve.

31 MANAGEMENT OF PURCHASED DEBTS

In accordance with Decree 32/92 and Law 41/93 in respect of the financial and banking sector, the bank is required to manage the purchased debts without remuneration in conformity with the terms of the debt purchase agreement.

32 FINANCIAL INSTRUMENTS

In the ordinary course of business, the group uses primary financial instruments such as cash and balances with or due to banks and other financial institutions, investments, receivables and payables. The group does not make use of derivative financial instruments. Information about fair values of financial assets and liabilities are disclosed in the respective notes to the consolidated financial statements.

33 FIDUCIARY ASSETS

The aggregate value of assets held in a trust or fiduciary capacity by the group at 31 December 2007 amounted to KD 486,825 thousand (2006: KD 467,356 thousand).

Fees and commission income include fees of KD 3,398 thousand (2006: KD 2,852 thousand) arising from trust and fiduciary activities.

34 ADJUSTMENT TO MURABAHA, WAKALA, ISTISNA'A AND LEASING INCOME

Murabaha, wakala, istisna'a and leasing income has been reduced by KD 556 thousand in the last quarter of the year. The charge represents an adjustment arising from revised estimates of future cash flows from a portfolio of performing finance facilities that have had their terms modified during the year.
